

REEL TABLE SETUP.WPS 20 Stop - 22 Stop - 25 Stop Machines (lables)

To move the reels, use a 12" ruler or something similar to slide in to the left of the reel and push back on the indexing lever (spring loaded). Locate the index mark 'X' on the left side of the indexing disk, and rotate the reel to center the 'X' to the detector board. This is position 1 (center payout line on the glass). Rotate the reels down when recording images/blanks. Fill out the portion that applies to your machine. See page 2 about the coin lockout circuit!

| | REEL1 (LEFT) | REEL2 (CENTER) | REEL3 (RIGHT) |
|----|--------------|----------------|---------------|
| 25 | _____ | 25_____ | 25_____ |
| 24 | _____ | 24_____ | 24_____ |
| 23 | _____ | 23_____ | 23_____ |
| 22 | _____ | 22_____ | 22_____ |
| 21 | _____ | 21_____ | 21_____ |
| 20 | _____ | 20_____ | 20_____ |
| 19 | _____ | 19_____ | 19_____ |
| 18 | _____ | 18_____ | 18_____ |
| 17 | _____ | 17_____ | 17_____ |
| 16 | _____ | 16_____ | 16_____ |
| 15 | _____ | 15_____ | 15_____ |
| 14 | _____ | 14_____ | 14_____ |
| 13 | _____ | 13_____ | 13_____ |
| 12 | _____ | 12_____ | 12_____ |
| 11 | _____ | 11_____ | 11_____ |
| 10 | _____ | 10_____ | 10_____ |
| 9 | _____ | 9_____ | 9_____ |
| 8 | _____ | 8_____ | 8_____ |
| 7 | _____ | 7_____ | 7_____ |
| 6 | _____ | 6_____ | 6_____ |
| 5 | _____ | 5_____ | 5_____ |
| 4 | _____ | 4_____ | 4_____ |
| 3 | _____ | 3_____ | 3_____ |
| 2 | _____ | 2_____ | 2_____ |
| 1 | _____ | 1_____ | 1_____ |

Page 2- clarifications and recording suggestions.

It helps me to program the tables if you follow this guide when recording the reel symbols.

| <u>Symbol</u> | <u>Record This</u> |
|---------------|--------------------|
| 7 | Seven |
| 3 Bars | Bar3 |
| 2 Bars | Bar2 |
| 1 Bar | Bar1 |
| Blank | Blank |

Fruit Machines:

Bell

Plum

Orange

Cherry

Carification on Indexing:

With the 'X' of the index reel centered in the detector, then symbol 1 appears on the center line of the payout glass on the machine. Note: Symbols (reel strips) do not have to align perfect. Just record the closest symbol to the payout line.

Some machines may have another symbol in place of the Seven. Just record a 'Seven' on the table (the big win). This translates in the program to the big win. There are 'Super-7' machines out there. 2 different sevens. Modify the payout table to match your game.

Please Indicate on the payout table the number of payout lines on your machine.

Important: Some machines have a relay mounted on the door, just to the right of the coin mechanism. One or two wires go from the relay to the coin

mechanism or coin lockout coil (behind the coin mechanism) If you have the relay on the door, please specify 'Relay on Door' on the Form! If you omit this information and you need a new game chip to correct the action of the coin lockout circuit, you will be charged \$40 (plus shipping) for the change.
